## Description:

Richard Babin demonstrates the arts of test cutting (tameshigiri) and sworsmanship (battodo). With co-author, Sensei Bob Elder, founder and president of the US Federation of Battodo and the US Federation of Toyama Ryu, Babin covers every aspect of the test-cutting process, including the selection of an appropriate blade, the construction of targets and stands, and the mechanics of cutting, all while emphasizing safety and proper attitude. This invaluable guide also teaches modern swordsmen how to completely rehabilitate a military sword for use in cutting, including straightening, sharpening and polishing the blade and making a new handle and scabbard.

This was a good read and helps to emphasize and teach a great foundation in Japanese swordsmanship. I would have given it 5 stars but I think that they need to update this book for 2013. Some key items have changed in terms of technology and accessibility of swords and wara. Color images and if the book was less wordy (meaning if the author stuck to the book's topic more closely) could have helped but these are small things and the extra info is actually very nice to have. If you are a cutter I think it's a must read.
